

**E Series No-Mounts
Mounting Group Design Review**

A Mounting Group must be added to the outer rail section of the E Series mast prior to using the mast if the mast is shipped from the factory as a “No-Mount” designed mast. This mounting design must be reviewed and approved by Lift Technologies, Inc. prior to the mast being put into service. LTI will send a written approval for your files.

Please submit mounting design and the completed form below to LTI Product Engineering.
